Reception Home Activities
Friday 13th May

We have started learning all about life cycles this week. So far we have learnt about the life cycle of a sunflower and a frog. We are looking forward to learning more about butterflies, chickens and spiders over the next few weeks! Can they tell you the life cycles they have learnt so far?
Thank you to those of you who attended Family Learning; it was great to see so many of you enjoying being part of school life and working alongside your child ☺

Phonics: This week we have used the phonics we know to help us write about life cycles. We have written labels for parts of a life cycle and, some of us have even written fact books about the life cycles! Please continue to practise the sounds we have learnt as well as the tricky words learnt so far. The children are finding some of the harder sounds tricky to remember such as air, ear, ure, er, ur.
Words to learn: them, now, down, just, help, it's, little, one, when, out, with, went, this, then, that, look.

Maths: In Maths we have been learning about subtraction. We have used number lines to help us count back to find an answer. Give your child a number between 1 and 20 and see if they can count back to 1 from it. Tricky Challenge: There were 16 tadpoles in the pond and 7 turned grew into tadpoles, how many were left as eggs? 16 – 7 =
These number problems are great for using the subtraction skill. Can you make up your own at home?

Please note the children in Reception visit the library on a Friday now as we have needed to change.

Tapestry

We are so pleased so many of you are enjoying the Tapestry system we have in place. Please feel free to upload Home Learning onto here too. Next Friday Mrs Miller will send home instructions on how to do this if any of you are having trouble ☺
