

The Flag Game

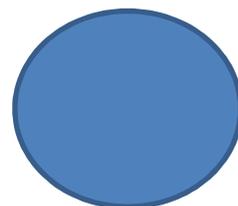

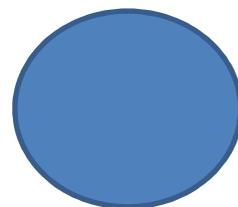

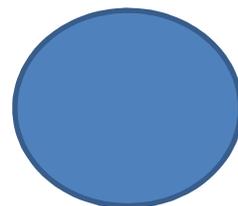

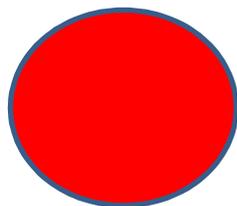

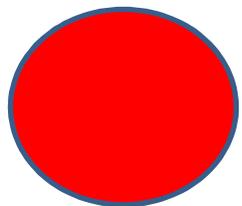

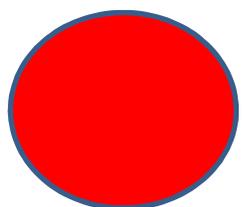

Greetings from The Gambia! We have sent you a game to play called 'The Flag' you will find the counters enclosed and the instructions' in this presentation. We really have fun playing and we hope you do to 😊

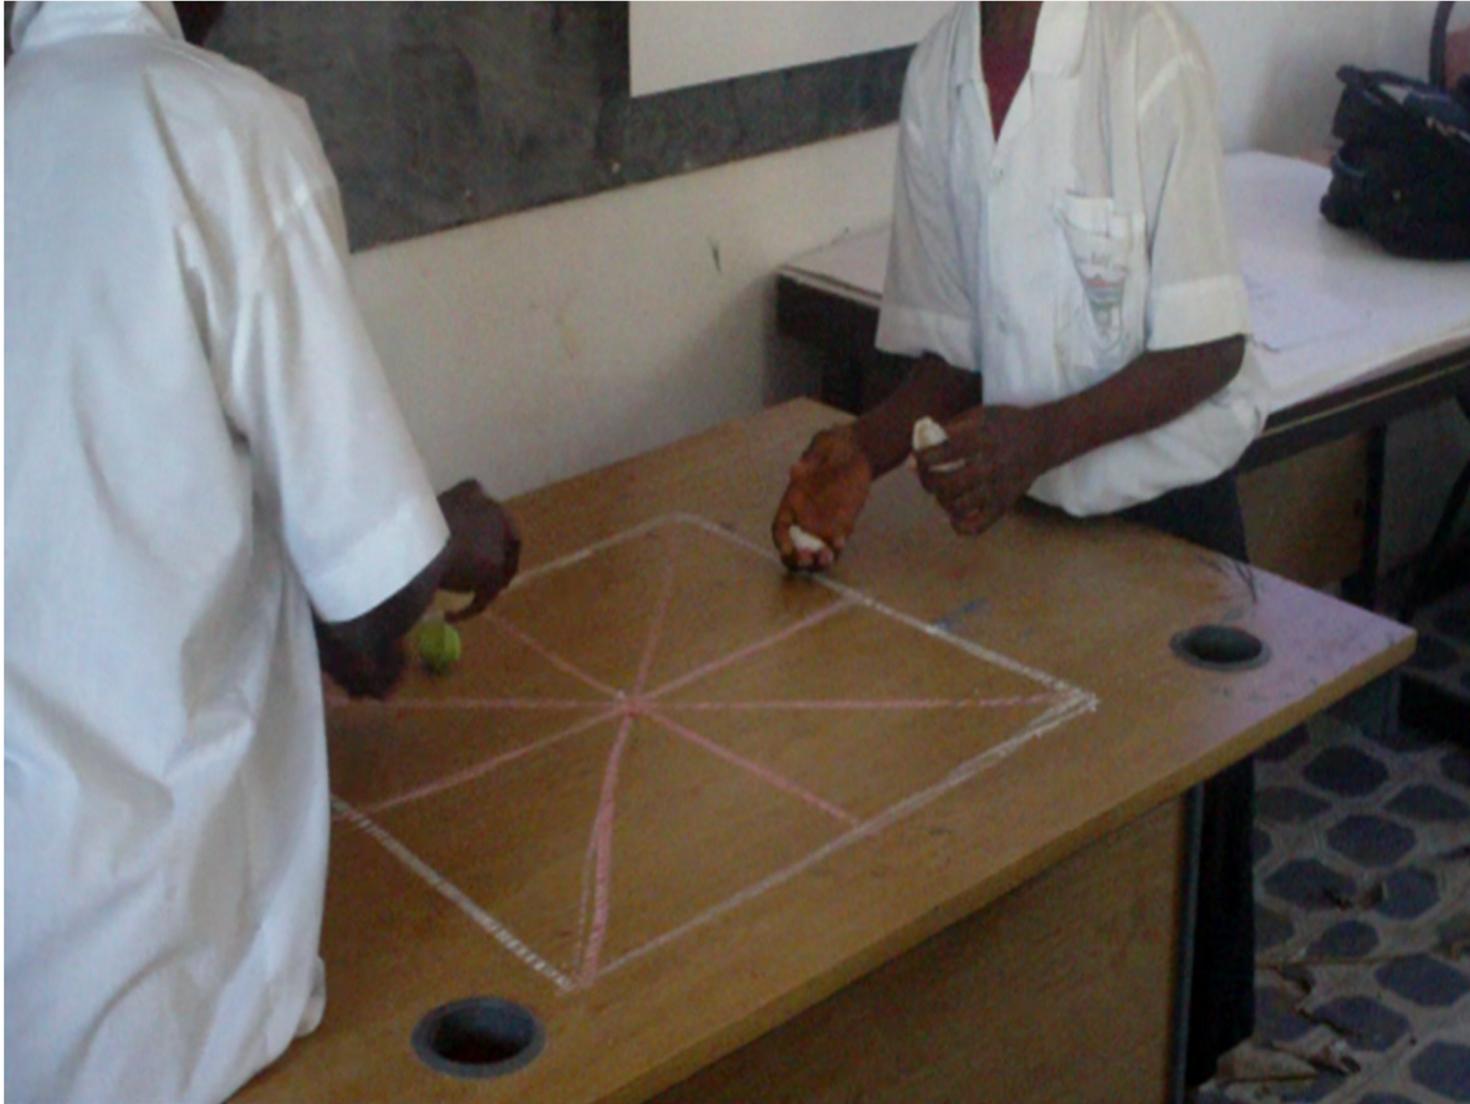

First you need to draw the 'flag' to play on, it looks like this

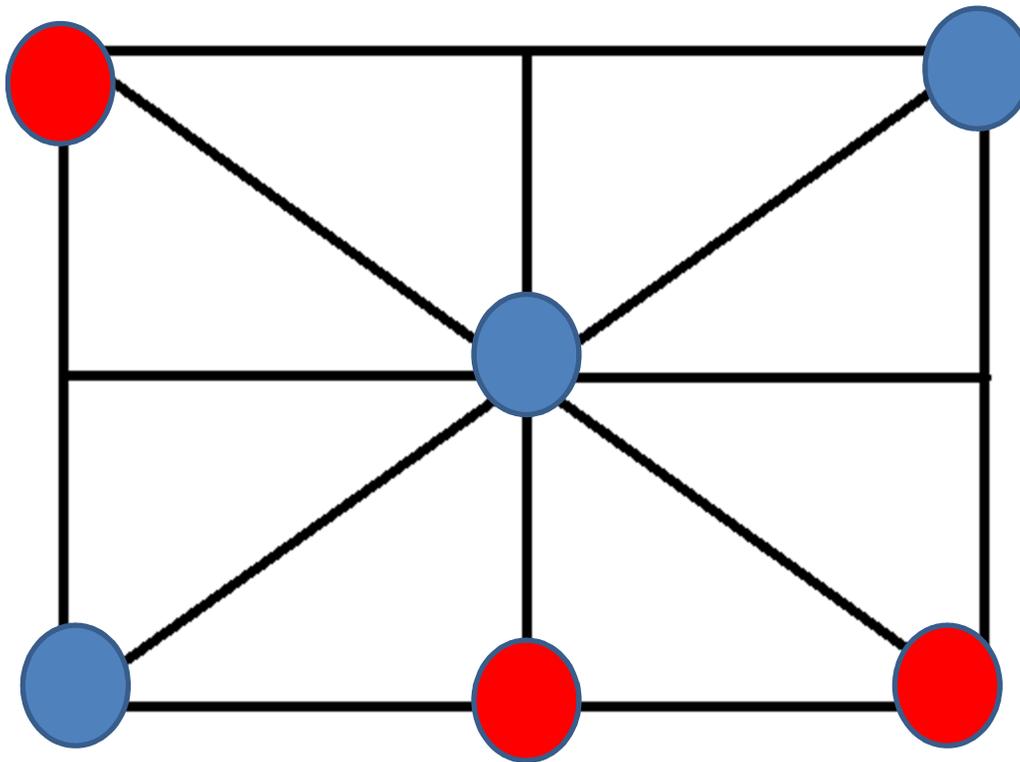

Each Player needs 3 Counters each to play

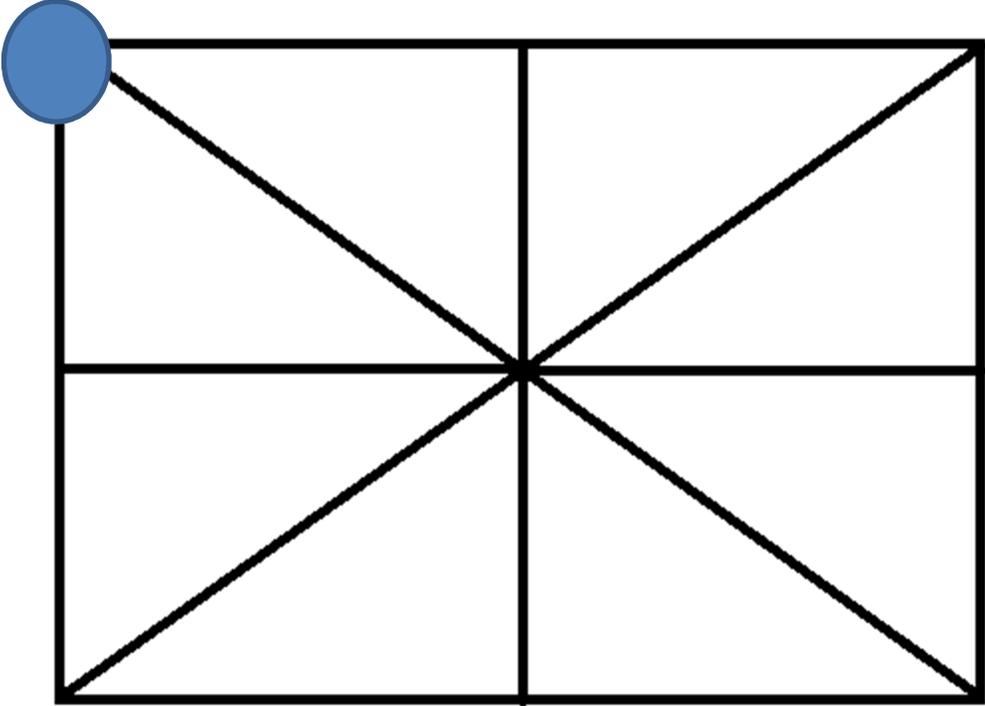

We chalk the game on a table and use bottle tops, shells, fruit seeds, stones – whatever we can find to use as counters.

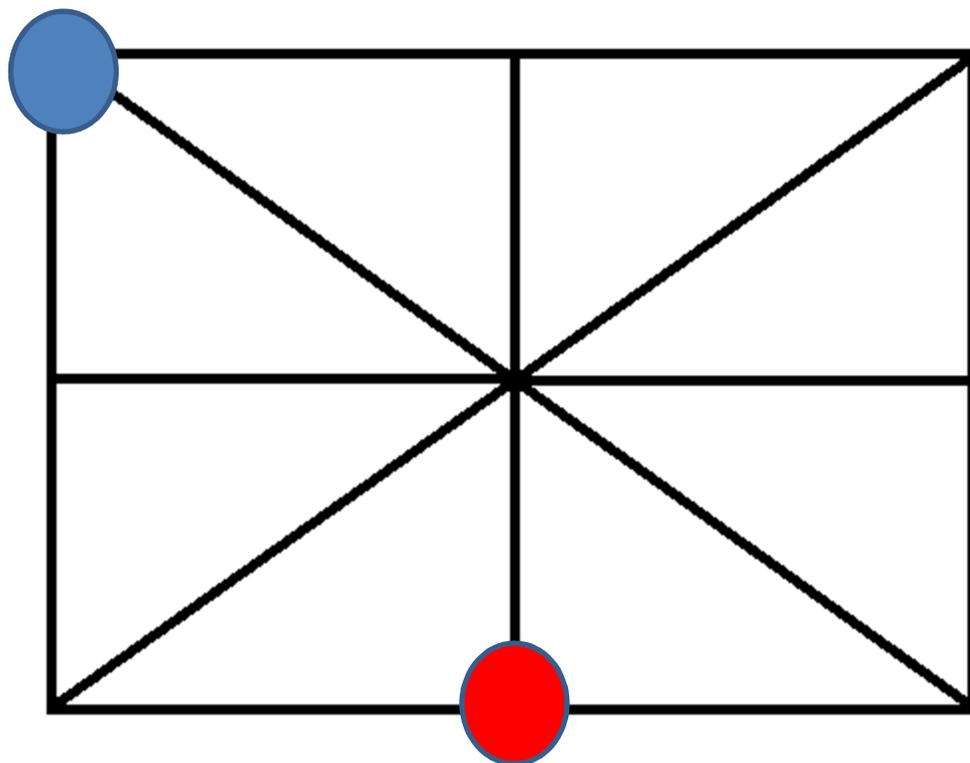

The aim of the game is to be the first player to get their 3 counters in a row on the flag while the other player try's to stop you whilst getting their 3 counter's in a row first

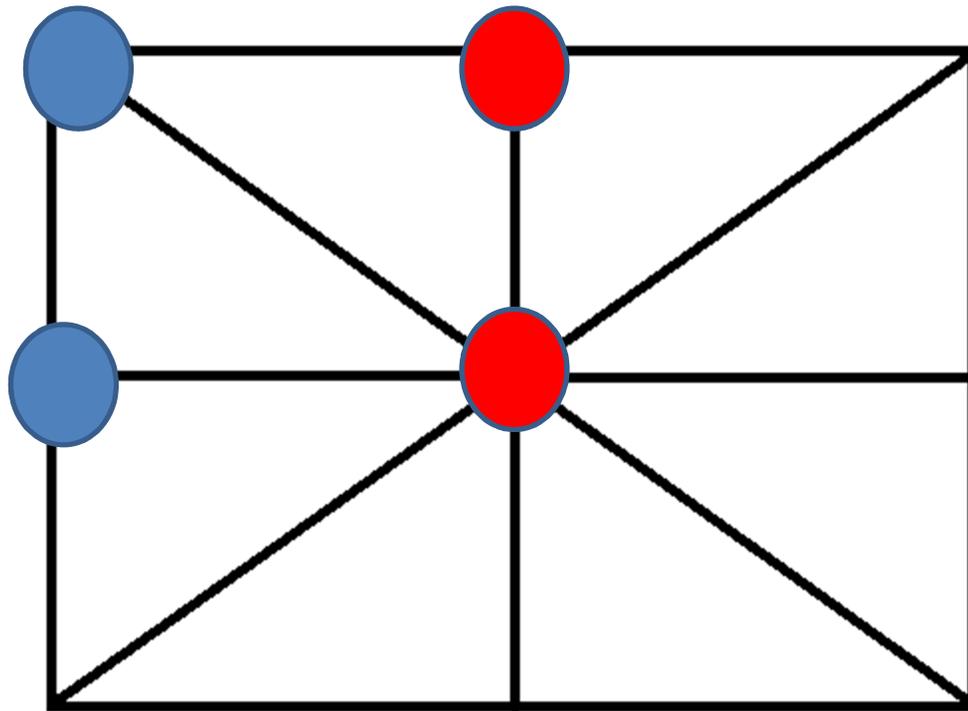

The first player puts their first counter on any point of the flag they want

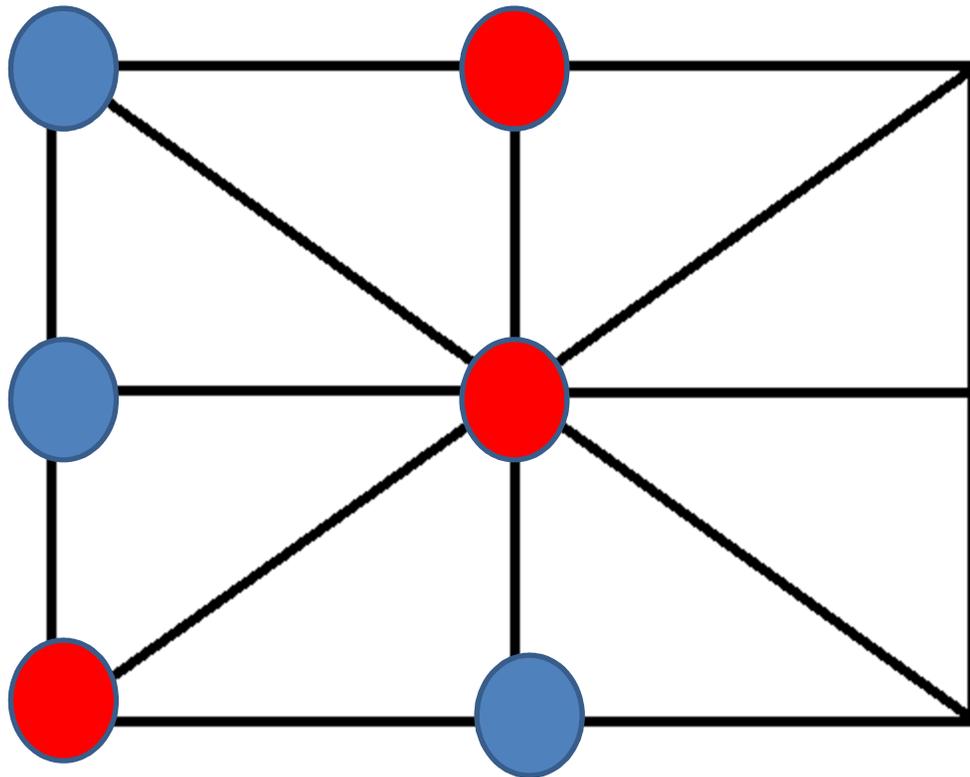

The second player then places their first counter on any point they want

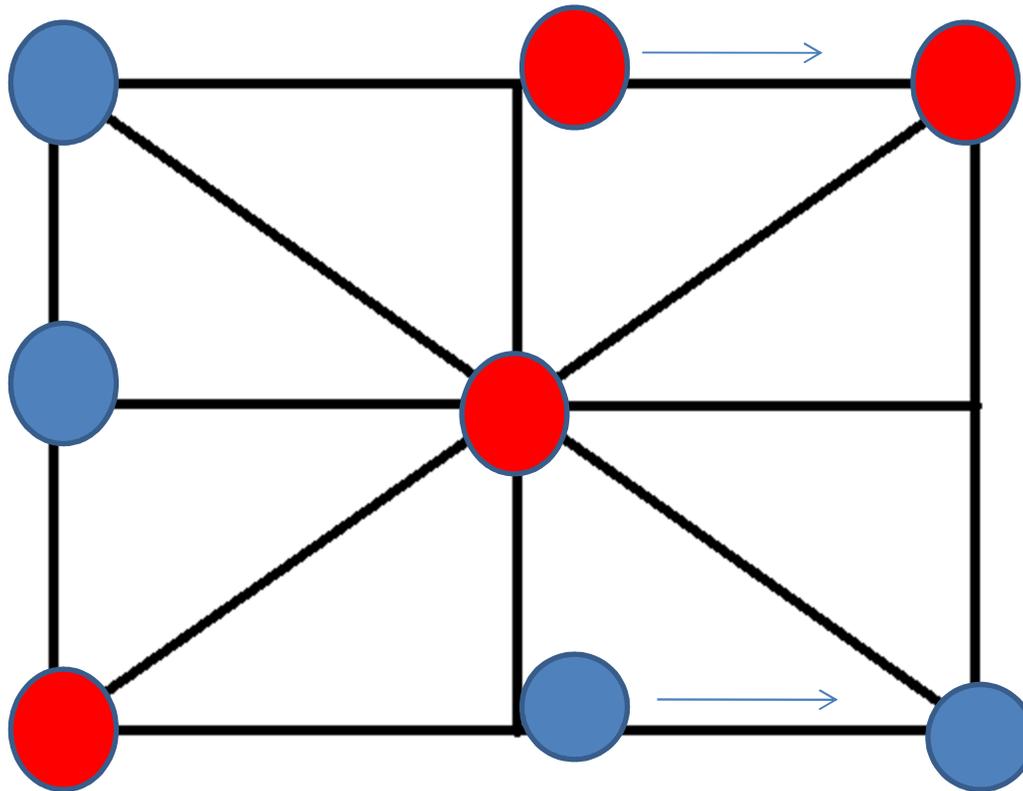

The first player then gets to place their second counter down and then the second player get's to do the same

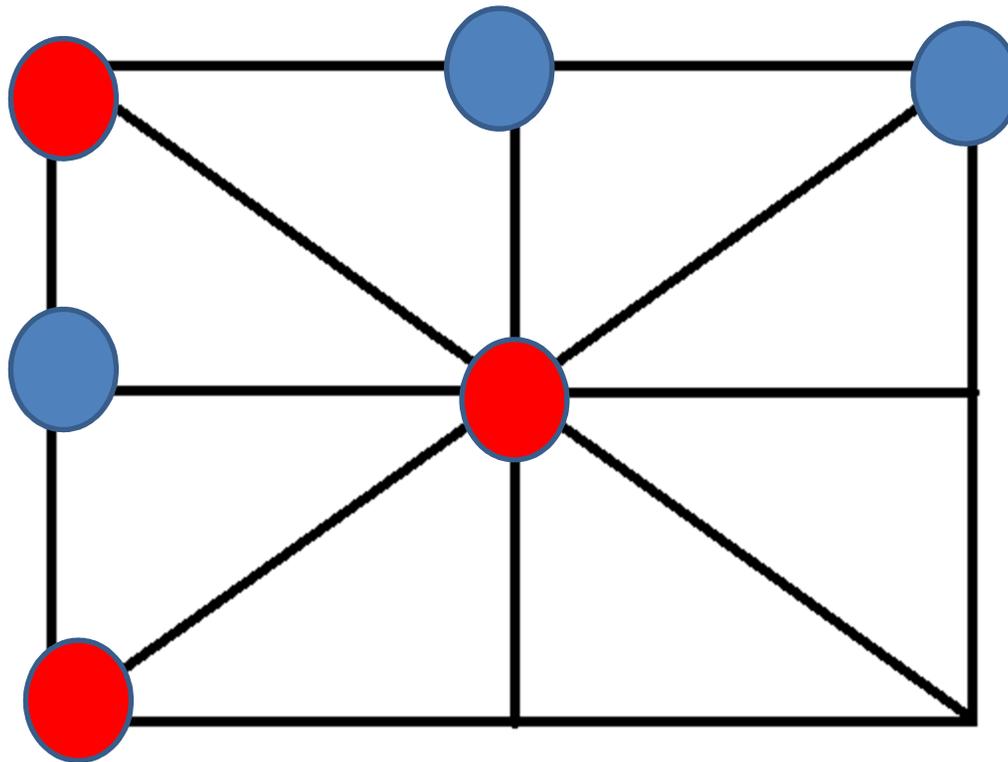

The player's then put their last counter's on the grid, it is important to look at where the other player has placed their counter as you may need to choose a point on the grid that stops them getting their three counter's in a row

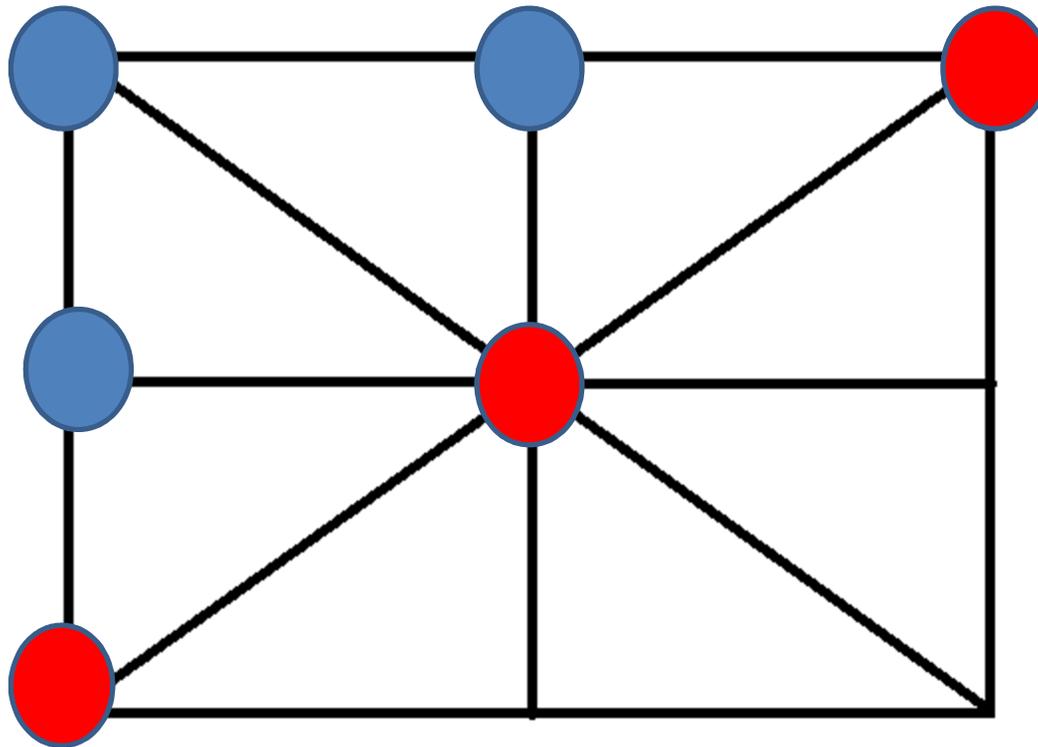

Each player must then take it turns to move one of their counters on the flag, a player can only move their counter to a point that is next to the point their counter is on and does not have a counter placed on it already

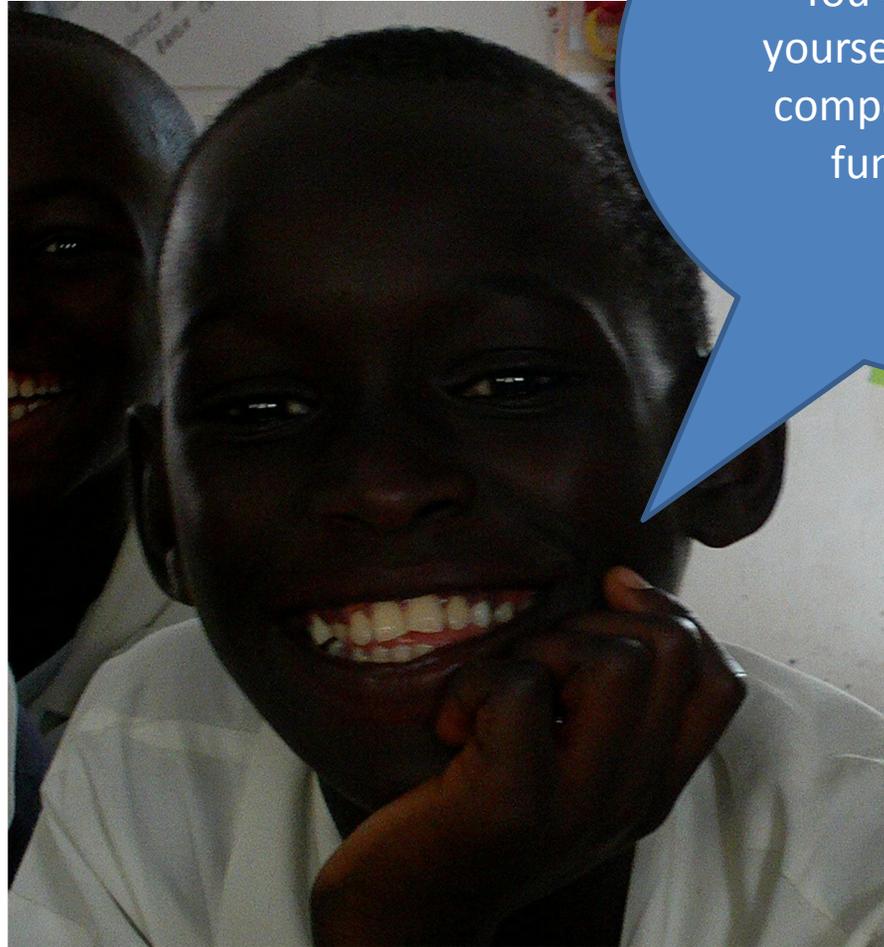

If a player's counter is surrounded by the other's player's counter's so they can't move, the other player gets to go again

Each player continues to move their counter's until one player has managed to place their three counters in a row and win

You can play between yourselves or even have a competition, it really is a fun game to play :)
